

G51

Compact with many installation options

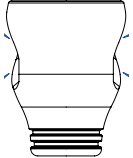

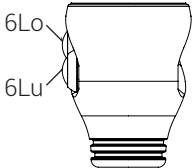

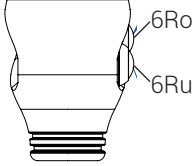

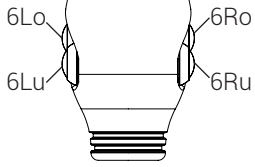

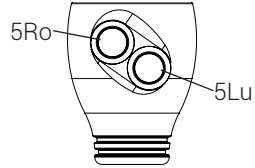

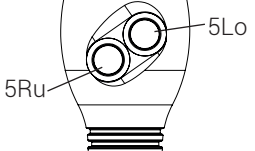

Small dimensions, compact and many installation options, the G51 combines all these features.

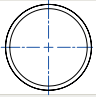

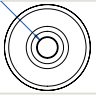

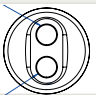

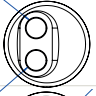

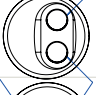

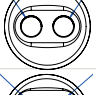

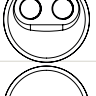

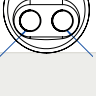

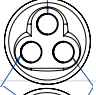

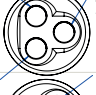

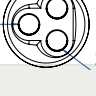

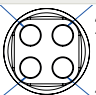

Up to 4 pushbuttons, optionally illuminated, can be installed in the flat top plate. Various standard layouts are available and customer-specific layouts adapted to the respective application are available on request. It is possible to install 2 pushbuttons laterally or 2 pushbuttons on the front side.

This handle offers the possibility, in addition to the joystick functions, to control further functions of a machine comfortably and to ensure an effective and fatigue-free working.

For applications in agricultural, forestry, construction and special machinery, we recommend mounting this handle on joysticks from the SPOBU product portfolio.

Description	Version	
Handle with base for maximum 4 pushbuttons and top plate for maximum 4 pushbuttons, including standard layout, without pushbuttons, Mounting adapter for SPOBU joysticks with 8 mm lever.	G51-8	
Handle with base for maximum 4 pushbuttons and top plate for maximum 4 pushbuttons, including standard layout, without pushbuttons, Mounting adapter for SPOBU joysticks with 12 mm lever.	G51-12	
Handle with special mounting adapter	G51-S0
